

Team SoPets SEP Project Update

Date: 13 March 2026

Summary

Over the past few months, we have focused on polishing the SoPets desktop companion into a feature-rich experience. The desktop companion now includes a full breeding system, expanded pet collection with 10 skin variants, interactive petting mechanics, an experience levelling system, and engaging minigames - bringing us significantly closer to a complete and enjoyable user experience.

Key Updates

- Polished the desktop companion with a full suite of features.
- Implemented a full breeding experience within the desktop companion, allowing users to breed and discover new pet combinations.
- Expanded the pet collection to 10 unique skin variants, giving users more variety and collectibility.
- Added interactive petting mechanics for a more engaging and personal bond with the user's SoPet.
- Introduced an experience levelling system where pets grow and evolve through interaction and care.
- Built multiple minigames to keep the experience fun and replayable.
- General polish and refinements across the desktop companion for a smoother user experience.

Upcoming Plans

- To continue refining and adding content to the desktop companion experience.
- To prepare for public launch and gather early user feedback.
